

## PROTECT YOUR HOME & PROPERTY!

Every year fires destroy hundreds of homes and scorch property and landscape. Wildfires can occur with little warning and spread quickly, especially in areas suffering from prolonged drought. Fire crews can be overwhelmed by the task of rapidly advancing wildfires, especially when city and county agencies are fighting multiple fires at once. There might not be enough personnel or equipment to defend every home. Sometimes, those precious few minutes it takes for crews to get to you are all that is needed to save everything. A garden hose can do very little, especially when fire crews deplete water pressure. Being prepared could make all the difference, and Keene's Fire-Fighter is one tool you cannot afford to be without.

**The water in your pool is all you need as a water source to protect your property!**

## THE KEENE FIRE-FIGHTER

**Model FF13H, Honda GX390 gasoline engine with a Y-Splitter capable of running two fire hoses.**

This must have tool is built on a cart with 10" tires for ease of access and set up. The Fire-Fighter is equipped with a powerful GX200 Honda gasoline engine and a pump that produces an adjustable stream of water up to 200 feet away! We're talking the same horse power that the pro's use! Roll into position next to the pool and it is ready for action. As easy to start as your lawn mower, a simple tug on the pullcord and you will be pumping water with up to 150 feet of head lift and 250 gallons per minute! Unit comes with 100 feet of 1 1/2 inch fire hose and an adjustable nozzle. Homeowners with swimming pools can protect their homes when fire threatens by soaking down roofs, walls and landscaping. Always ready in any emergency, even when water pressure and electrical power fails. Fire Insurance won't keep the flames away from your home! If you live in drought ravaged areas, especially in the foothills, high fire zones, isolated areas with brush and natural wild growth, you need the Keene Fire-Fighter. Make sure you have this powerful protection to guard everything you have worked so hard for from the disaster of fire! This is our latest and largest fire fighting pump capable of pumping greater distances plus easy and start and prime. The FF13H Powered by a GX390 Honda motor the drives our PHP500 pump. This pump produces up to 400 GPM with a head lift of 161 feet. This will provide ample water for 2 fire hoses working at the same time. The pump is also upgraded with 3 additional upgrades. A drain port that should be used after each use fore long term longevity. A 3" quick coupling for pump intake that decreases set

up time and require no tools. A 1" port that can be used to attach a smaller hose even a garden hose for additional protection. Equipped with standard fire threads making it ideal if the fire department want to tap into your system. The 2.5" Y valve with dual high flow shut off valves for complete control to quickly switch from 1 hose to 2 hose. The system is both electric start and manual start for redundancy. Mounted on a aluminum dolly type cart with large 10" wheels optimizing movement up and down steps and rough terrain. The cart carries 100 feet of double wall fire hose and also our short test hose and nozzle, fire fighter nozzle, F F nozzle pistol grip w/shut off valve and fire fighter straight stream nozzle.

**PROTECT YOUR PROPERTY LIKE A PRO!**

**FFFG**

Take your Keene Fire-Fighter to the next level with an extra dose of security and efficiency. Foam concentrates can increase the coverage of a limited water supply, up to five times! Foam breaks down the water's surface tension which ultimately improves water penetration into porous surfaces which ultimately slows evaporation. The bubbles created act as an insulating barrier which help reflect heat away from the treated areas. Why is this important to you? It means that when using the Foam-Fast system, you can protect your property with five times the effectiveness than plain water alone. Comes with three foam-fast cartridges. Each unit comes with a 50 gallons per minute nozzle, a 15 inch long mixing chamber, two pistol grips and an adjustable shut-off handle. The Foam-Fast Applicator is a simple and effective method of deploying wetting agent onto a fire.
